

33kV ICP CONNECTION FOR A GLOBAL EPC AND O&M CONTRACTOR

OVERVIEW

Location	Solution	Installation
Arbroath	33kV ICP connection	June 2022

A BESPOKE DESIGN AND CONSTRUCTION PROJECT FOR A 33kV ICP CONNECTION, AT A BATTERY STORAGE FARM IN ARBROATH, SCOTLAND.

The solution included installing a 150 metre stretch of 33kV 500mm² Al cable up to the point of connection. Also included were contestable elements such as civil works and protection & control systems - all installed in accordance with the client's exacting specifications.

This tailored renewable infrastructure project was delivered to the highest standards of safety, quality and sustainability.
